# TRAIL

TRANSLATIONAL RESEARCH  
AND INFORMATION LAB  
accelerating innovation in health care

<https://hsl.uw.edu/trail/>

**Mission:** A collaboration accelerating healthcare research through tools, team science and applications.

- 1 Developed a virtual reality studio** with programs and services for clinicians
- 2 Redesigned the TRAIL website** for improved usability by health sciences researchers
- 3 Provided excellence and set up a high standard of support** for UW's REDCap instance and users
- 4 Developed and taught an online data management course** for health sciences researchers
- 5 Advanced the Population Health initiative** by investigating the LiveStories platform
- 6 Introduced initiatives to support the continued success** of TRAIL staff members

51  
Virtual Reality sessions

14  
TRAIL services

8,731  
REDCap tickets answered

277  
REDCap class attendees

98  
Research Data Management  
course participants

5  
LiveStories data  
visualizations

# UW LIBRARIES STRATEGIC PLAN 2018-2021

Enrich the Student Experience  
Enhance Equitable Environments for Research, Learning and Working  
Grow as a Learning Organization  
Advance Research for the Public Good  
Accelerate Scholarship and Learning through Responsive Collections

HEALWA, in its 11th year, targeted outreach to nurses in Eastern Washington through webinars.

\$3,097,388  
Annual Budget

203,802  
Participating Professionals

25  
Professions

Washington use of HEALWA (1/1/18)

## IMLS Grant: VR Primer and Studio

URL for primer: <https://hsl.uw.edu/vr-studio/>

Above: Rendering of VR use in the Translational Research & Information Lab (TRAIL).

To identify the technology and space needs for a library-based, clinically-focused virtual reality space, HSL staff organized and led two full- and half-day retreats with:

- surgeons
- nurses
- radiologists
- research scientists
- computer programmers
- an interior design architect
- health sciences librarians
